

User Story: As a Member, I want to make contributions online via a third-party payment gateway so that I can pay conveniently and securely.

UAT Scenarios (Given–When–Then)

1. Successful Payment

Given I am a logged-in member

And I am on the contribution payment page

When I enter a valid contribution amount and valid payment details

And I submit the payment

Then the payment is processed successfully via the payment gateway

And my contribution is recorded in the system

And a confirmation message is displayed on the screen

2. Invalid Payment Details

Given I am on the payment page

When I enter incorrect or invalid card details

And I attempt to process the payment

Then the payment is rejected by the payment gateway

And I see an error message indicating invalid payment details

And no contribution is recorded

3. Cancelled Payment

Given I am redirected to the third-party payment gateway

When I cancel the payment before completion

Then I am returned to the system

And the contribution status is marked as cancelled or pending

And no payment is recorded

4. Empty or Missing Fields

Given I am on the contribution page

When I leave required payment fields empty

And I attempt to submit the payment

Then the system displays validation messages

And the payment is not processed

5. Receipt Generation After Payment

Given I have successfully completed a payment

When the transaction is confirmed

Then a receipt/reference number is generated

And it is displayed to me
And stored in my contribution history

6. Network Failure During Payment

Given I am in the middle of a payment transaction
When there is a network interruption
Then the system does not complete the payment
And no duplicate or partial transaction is recorded
And I receive an appropriate failure message

7. Duplicate Payment Prevention

Given I am on the payment confirmation step
When I click the "Pay" button multiple times
Then only one transaction is processed
And duplicate payments are prevented
